

# Central African Republic

CAR is renowned for its massive Lord Derby or Giant Eland Bulls. Also common to the Cameroon Savannahs, the quality of CAR Eland is beyond compare and without a doubt, CAR produces the best trophies on the continent with the magical 50" mark not merely a dream for hunters. Regardless of the horn size the most majestic aspect of the Lord Derby Eland is the character with which the old bulls carry their horns brooming them down by scraping and rubbing trees.

The hunt is probably one of Africa's most challenging and rewarding safaris with a moderate level of fitness and stamina required while the reward at the end of the day is nothing short of magnificent.

Our hunting block, Zamza in the northeast, consists of over 1 million acres of prime Gardenia and Terminalia forest, perfect habitat for Giant Eland with their movement prolific throughout and very conducive to a successful hunt. It is surrounded by rivers and streams attracting many different species to graze on the plains across from camp. These include indigenous species such as savannah Buffalo, forest Situnga, western Roan, yellow backed Duiker, SingSing Waterbuck, Lewels hartebeest, western Kob, harnessed Bushbuck, red flanked Duiker, Red river hog, Oribi and Warthog. In all CAR offer a complete list of Africa's northern species and our hunting area is without exception one of the top safari hunting destinations in this country.

The best time of the year to hunt Eland is from February through mid April and during this period no specific month is any better than the other.

<b>20 Day "Grand Classic" full species Safari</b>	\$56,800 (full species safari)
